SECOND SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Applicant wishes to bring to the attention of the U.S. Examiner references which have come to the Applicant's attention as a result of corresponding Examination procedures.

2 Japanese Patent Application Laid open number JU63-92457 which discloses an image reading device comprising an original reading unit and an original carrying unit. Applicant attaches a partial translation of the specification. No full translation of this reference is available to Applicant at this time.

2 Japanese Patent Application Laid open number JP4-315362A which discloses a portable picture reader and its original carrier. The original carrier is loaded\removed to\from the portable picture reader and it is loaded when lots of sheet originals are read. Applicant attaches a translation of the abstract. No full translation of this reference is available to Applicant at this time.

2 Japanese Patent Application Laid open number JP5-185659A which discloses an image

recording apparatus having image reading function including a replacement set of a manual feed unit. Applicant attaches a translation of the abstract. No full translation of this reference is available to Applicant at this time.

Japanese Patent Application Laid open number JP62-25556A which discloses a picture reader having a picture read section that has the first case and the line image sensor and the upper rollers that are supported in the case. Applicant attaches a translation of the abstract. No full translation of this reference is available to Applicant at this time.

Japanese Patent Application Laid open number JP62-30461A which corresponds to U.S. Patent 4,652,937. Which discloses a facsimile equipment that is placed on a case of a transmitting section with its own opening down. Applicant attaches a translation of the abstract.

Japanese Patent Application Laid open number JU62-77953 which discloses a portable facsimile transmission device which is a first and a second unit which can be separated. Applicant attaches a partial translation of the specification. No full translation of this reference is available to Applicant at this time.

Japanese Patent Application Laid open number JU64-16758 which discloses a facsimile device having an original reading part which is formed by an image sensor for optical-electric conversion of the original and optical guide of lighting source. Applicant attaches a partial translation of the specification. No full translation of this reference is available to Applicant at this time.

Japanese Patent Application Laid open number JU2-51453 which discloses an image

data transmission device having a communication device transmitting image data and an image reading device reading in an original image. Applicant attaches a partial translation of the specification. No full translation is available to Applicant at this time.

2) Japanese Patent Application Laid open number JU5-18168 which discloses an image reading device having a handy scanner to read an original in an automatic document feed device composing a paper feeding roller. Applicant attaches a partial translation of this specification. No full translation of this reference is available to Applicant at this time.

2) Japanese Patent Application Laid open number JP6-103208 which discloses a scan service system having an image storing/editing device. Applicant attaches a translation of the abstract. No full translation of this reference is available to Applicant at this time.

2) Japanese Patent Application Laid open number JP8-298575A which discloses an image reader having a body type device main body sealing a reading window. Applicant attaches a translation of the abstract. No full translation of this reference is available to Applicant at this time.

Respectfully submitted
for Applicant,
